

# Agaamin

Your friendly neighborhood  
digital identity provider

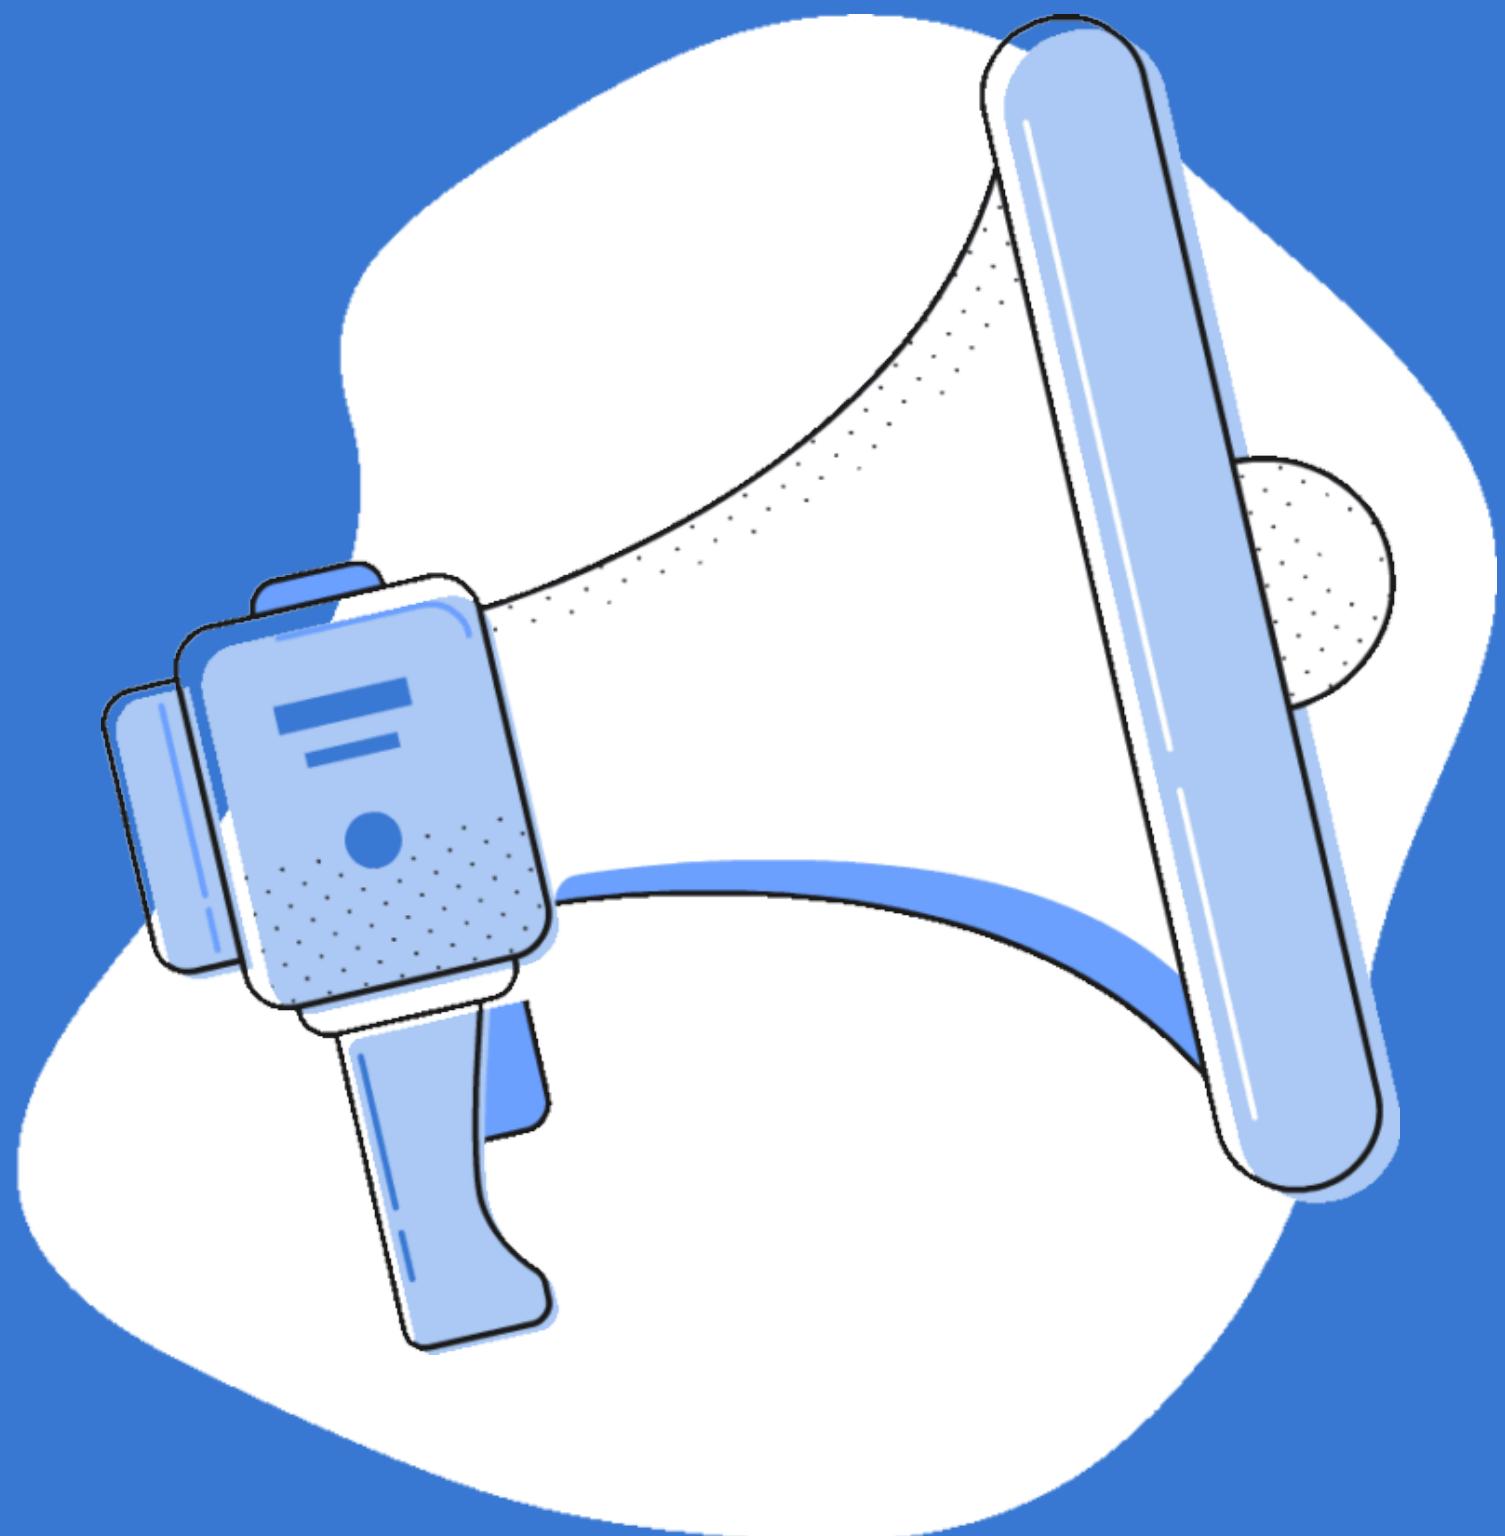

Look this up on the internet

**sajan.bh3**

And I mean literally anywhere  
on the internet ! Browser, Search Engine  
Youtube or even social media platforms.

# You will notice

Irrespective of where you look online.  
Search, social media, Chat apps etc.

My profile will always be on top.  
**ALWAYS!**

# Everywhere on the internet

The image consists of five side-by-side screenshots from various mobile applications, all displaying the search results for the handle "sajan.bh3".

- Screenshot 1 (Left):** LinkedIn profile for Sajan Nair (sajan.bh3). It shows his professional bio, 5K followers, and posts from his network.
- Screenshot 2 (Second from Left):** LinkedIn feed for sajan.bh3. It shows a post by Sajan Nair replying to others and another post about linking UPI IDs to Handshake Names.
- Screenshot 3 (Third from Left):** X (Twitter) feed for sajan.bh3. It shows a tweet from StockEdge (@mystockedge) featuring a QR code over a vegetable market photo, with a video overlay of Sajan Nair.
- Screenshot 4 (Fourth from Left):** Instagram feed for sajan.bh3. It shows a list of accounts starting with "sajan.bh3" followed by variations like "sajan.bhatti302" and "sajan.bhai.2032".
- Screenshot 5 (Right):** YouTube channel page for "sajan.bh3" (Agaamin Technologies). It shows the channel's profile picture, subscriber count (10), and a video thumbnail of Sajan Nair speaking.

Each screenshot includes a timestamp at the top indicating the date and time of the capture.

**This is my  
Universal Digital Identity.  
Also known as a  
Smart Name.**

# One single unique name for

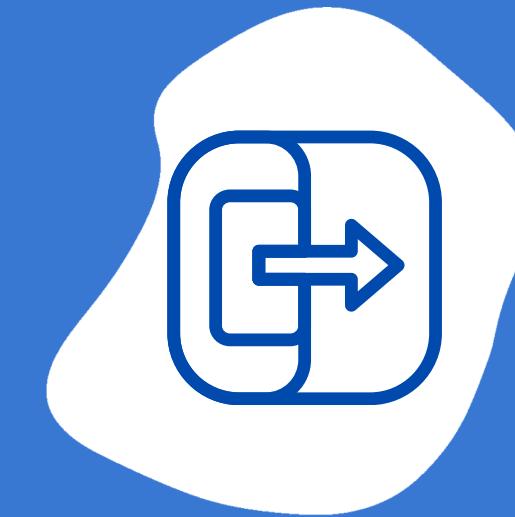

Your Domain Name

Your financial id  
for UPI, mPesa,  
crypto and CBDC's

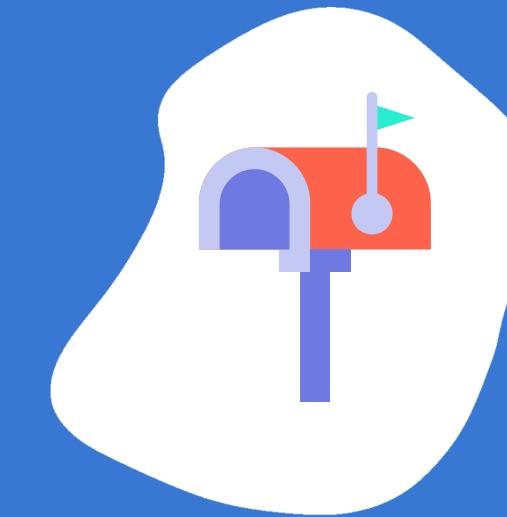

Your Avatar in  
Meta verse

Your Single Sign  
on for dApps

A Non-fungible  
asset

Email ids like  
नमस्ते@नेहा.भ

# Smart names as universal digital identity - Our USP

Smart Names are multi-lingual. They can be in English, vernacular languages or even emojis.

Versatility - It can be your social media moniker, your financial address, your avatar in the metaverse, Aadhar Name and lots more.

It can serve as a universal financial address - It can work as your UPI address, Crypto Wallet address.

Immutable Identity - Smart Names are domain names hence its one person one name and establishes immutable confirmation of individuals identity.

Social Currency - The domain extensions are expressive and can be used to communicate profession or signal status. Eg: Ivy league students using college branded names like .iima or iimc , or community based like .isha or language based like .भ in devanagri for bharat or .عَمَّا in arabic for Ummah and so on...

Your unique online identity

Choosing your name wasn't in your hands, but choosing your online name can be. Find the one that defines you!

Get your Smart name here

e₹

**Smart Name  
usecases currently  
under development.**

# Smart Names as Payment Identity

We are building a payment app for:-

- UPI (Unified Payment Interface)
- International transfer (Like a Paypal)
- Crypto Wallets
- CBDC Wallets - When and if relevant.

**This will ensure that smart names will work as universal financial IDs for users.**

# Your Smart Name is your Aadhar Name

Aadhar logins have not really taken off outside of Govt. websites. The reason for this is that most of us don't remember our Aadhar number, thus is not a very user friendly login system. Smart Names as a human readable layer on top of the Aadhar Infrastructure will solve this.

This will incentivise online services in India to use Aadhar Names/Numbers as identity layer, instead of Gmail /Facebook etc. and significantly prevent Indian data from leaving territory.

# What Are Handshake Domains and How Do They Work?

 John Hughes / August 23, 2023 / [Domain Extensions](#), [Domains](#)

While exploring domain name ideas for your site, you may come across Handshake domains. If you're new to the concept, you may be wondering what they mean and how they work.

Handshake domains are registered on a blockchain network. Additionally, they can only be obtained through auctions. While they may seem a little elusive, getting a Handshake domain may not be as difficult as you might think.

In this post, we'll take a [closer look at Handshake domains](#) and how they work. We'll also discuss [who needs a Handshake domain](#) and show you [how to obtain one](#). Let's get started!

# The Decentralized Internet of the Future is Here!

## Namecheap Now Offers Handshake Domain Name Registration Services

*Experience more freedom with a decentralized web on a peer-to-peer network using blockchain technology*

**Phoenix, AZ - September 22, 2021** - Namecheap, the world's second-largest domain registrar, announced the launch of registration services for Handshake domain names. Handshake (HNS) is a peer-to-peer network that uses blockchain technology — like a secure public registry. It's a new approach to domain name ownership that bypasses traditional organizations and registry oversight, offering consumers more control and ownership of their domain name and website.

Starting today, anyone can find, select and register a Handshake domain name in Namecheap's main Domain Search tool. Simply visit Namecheap.com and click the "HNS" button option after entering a desired domain name in the search bar. After registration is complete, customers will have the ability to manage Handshake domain names in their Namecheap user account.

## News: BETA: Handshake Domain Support

Published: 2022-07-02

You may or may not have heard of Handshake domains. They're a bit new, a bit wild, and opinions will vary. However, this feature has been requested and we're going to concede that the domains are kind of cool. If you want a full look at it, take a look here: <https://handshake.org>

Basically, it's an experimental alternative to the internet root system. It's working toward a decentralized internet by challenging the very root of the internet as we know it. The domains are usually managed here: <https://www.namebase.io>

As of right now we are supporting, but calling it BETA, Handshake domains. Now when you purchase something on Namebase it can be a bit confusing. For example, we purchased "mxroute" and you might think "Oh, so we would email jarland@mxroute." That isn't quite the intent. You see, "mxroute" is the TLD. The subdomains of that TLD are what would be most similar to the domains you are used to working with. As another example, mxroute.com is a subdomain of the .com TLD. The TLD is com, the subdomain is mxroute. So in our test, my email is actually [jarland@email.mxroute](mailto:jarland@email.mxroute). You wouldn't be able to add "mxroute" as a domain in DirectAdmin, but you could add email.mxroute as a domain in DirectAdmin. Does that make sense?

To a lot of you this may be very confusing and of no particular value. However, those of you who are really into this stuff will quite enjoy it I think. So have at it, add your Handshake domains to DirectAdmin and go nuts!

# Use Smart Names on social networks like Blue Sky, Nostr, Activity Pub

https://staging.bsky.app/settings

org All Posts PeakD Home Media Library Scree... India Herbs 2-Tier... 5 Plugins to Turn a... HTML Sitemap Navi... CatsWhoCode: We... Create Handshake... Tamil Surnames

The screenshot shows the user's account settings on the Blue Sky platform. The left sidebar includes links for Home, Search, My Feeds, Notifications, Moderation, Profile, Settings, and a prominent New Post button. The main content area displays the user's email (s@agaamin.in) and a list of signed-in accounts:

- Agaamin (hi.agamin)
- Sajan Nair (sajan.bsky.social)
- Sajan Nair (sajan.bh3)

Options for adding a new account and inviting friends are also present. A pink banner at the top right states "SANDBOX. Posts and accounts are not permanent." Navigation links for feedback, privacy policy, and terms are available at the bottom right, along with information about invite codes and appearance settings (System, Light, Dark).
